EDUCATION

Chennai Institute of Technology <i>Bachelor of Technology in Computer Science and Business Systems [CGPA - 8.68]</i>	Chennai, India November 2023 – November 2027
--	---

INTERSHIP

Web Development Intern <i>Altruisty</i> - Developed and deployed the official company website using the MERN stack (MongoDB, Express, React, Node.js). - Designed a modern, responsive interface with dynamic functionality, ensuring an optimal user experience.	June 2024 – July 2024 Chennai, India
Research Intern <i>Chennai Institute of Technology</i> Paper 1: <i>The Convergence of Artificial Intelligence, Internet of Things, and Brain-Computer Interfaces: Innovations, Applications, and Challenges.</i> Paper 2: <i>The Intelligent Public Health Surveillance System: A Cutting-Edge Approach to Monitoring and Predicting Public Health Threats.</i>	Nov 2024 - Dec 2024 Chennai, India

PROJECTS

Agrivoice (AI & IoT) <i>Python, Raspberry Pi, ESP32, NPK Sensors, Machine Learning, Google Speech-to-Text, Firebase</i> - Built an AI-powered assistant for farmers to monitor crop health, weather, and soil conditions. - Integrated IoT sensors for real-time data collection and analysis.
Mess Management App <i>Flutter, Machine Learning, Chatbot</i> - Developed a system to streamline communication between mess admins and students. - Enabled students to check daily menus and select meal portions, helping mess admins cook precise quantities to reduce food wastage, aligning with UN SDG goals.
Finding Missing Person App (SIH 1790) <i>Face Recognition Model, React, Python, WhatsApp API</i> - Solution to the Smart India Hackathon (SIH) problem statement 1790. - Designed a system to identify missing persons and criminals using AI-powered facial recognition - Integrated with CCTV cameras to detect registered faces in real-time and notify the concerned authorities through WhatsApp API.
Altruisty <i>MERN Stack (MongoDB, Express.js, React.js, Node.js)</i> Developed and launched Altruisty's official website using the MERN stack delivering a modern, responsive design with dynamic functionality and seamless user experience
Return Logistics Management System <i>MERN Stack, Python, Firebase, Socket.IO, Machine Learning Chatbot</i> - Built a system to track and manage returned products, optimizing reverse logistics. - Implemented real-time order tracking and automated return processing.
ML Chatbot <i>BERT, Hugging Face Transformers, NLTK, Firebase, React.js, GitHub</i> - Designed an AI-powered chatbot using BERT for intelligent NLP-based conversations. - Enabled context-aware responses and multi-turn dialogue handling.
Healix Medical Application <i>Flutter, Node.js, Django, MongoDB, Firebase, Hyperledger Fabric</i> - Created a telemedicine app for doctor consultations, appointment booking, and medical record management. - Implemented secure authentication using Blockchain and a user-friendly interface.

CERTIFICATIONS

- Cloud computing (NPTEL) - COURSERA - Algorithm on Graphs - COURSERA - Basics of Data Structure Algorithm - AWS Cloud Practitioner	- COURSERA - Algorithm on Strings - Introduction to cybersecurity (CISCO) - Cybersecurity Essential (CISCO)
---	---

TECHNICAL SKILLS

Languages: Java, Python, C,C++ Full-Stack Development: HTML , CSS, Javascript, Node.js, Express.js, React.js, Next.js Database & Cloud Technologies: DBMS, SQL, MongoDB, PostgreSQL Mobile App Development: React Native, Flutter	Design & Prototyping: Figma, Adobe Photoshop Python Libraries & Frameworks: Pandas, Pytorch Development & Productivity Tools: PgAdmin ,MS word, Excel, Powerpoint Version Control: Git , Github
--	--

ACHIEVEMENTS

Selected as an Amazon Future Engineer (AFE) - FFE Scholar at Amazon . Smart India Hackathon: Shortlisted in the internal hackathon at the prestigious SIH. K! Hackathon Finalist: Secured a spot in one of South India's largest tech hackathon. Inter-Department Project Expo (Hardware) Winner: Recognized for outstanding innovation and execution. Solved 650 problems and achieved Knight batch in Leetcode
